Tall Building Fire Safety Management has never been more relevant. The Tall Building Fire Safety Network will deliver great training and conferences in 2020. There are 2 dates for the very popular IFE Recognised Tall Building Fire Safety Management Course TBFSM (see details overleaf).

The TBFSM course has been completely reviewed and rewritten to reflect the learnings from the Grenfell Tower tragedy.

Alongside the training, the Tall Building Fire Safety Network will be running 3 highly relevant one day conferences alongside FIREX in London:

- Construction Fire Safety—8th September 2020
- Tall Building Firefighting—9th Sept
- Crisis Management in Tall Buildings—10th Sept

UK Office: +44 07951 190576
E-mail: russ.timpson@tallbuildingfiresafety.com

www.tallbuildingfiresafety.com
Programme

Day 1 -
Theme: **Prevention**, including; case studies, fire risk assessment, management systems

Day 2 -
Theme: **Detection and Alarm**, cause and effect, maintenance, degraded systems, false alarms

Day 3 -
Theme: **Escape**, evacuation strategies, lifts, disabled escape, wayfinding, car parks

Day 4 -
Theme: **Containment**, passive barriers, steel protection, sprinklers, construction work

Day 5 –
Theme: **Firefighting**, fire statistics, fire growth, firefighting techniques, wind driven fires

This course is ideal for anyone who has a responsibility for managing fire safety in a tall building, including: high rise residential, hotels, business and office blocks and mixed use. Delegates are assumed to have a level of fire safety knowledge equivalent to that of a fire warden—prior to the course.

Course Director—**Russ Timpson**

is a Chartered Fire Engineer, with many years experience of fire safety management. He is the secretary of the Tall Buildings Fire Safety Network, which has been established since 2009. RT's career included Group Fire Strategy for BAA, looking after 7 UK, and 8 International Airports. RT is an active member of the Institute of Fire Engineers and delivers regularly CPD events for practicing fire engineers and fire risk assessors. Russ was recently awarded International Fire Professional of the Year 2015.

What Previous Delegates Have said:

“I attended the training course for fire safety management in tall buildings; although I have been doing fire safety for over 20 years this course really opened my eyes to the plethora of problems that have to be addressed when managing multi occupants in tall buildings and should not be underestimated.

The instructors' were first class they brought their wealth of knowledge and practical experience to all the problems that can occur in these types of buildings and it was illuminating.

I would thoroughly recommend this course to any person who has to manage fire safety in tall buildings”.

I just wanted to reiterate the excellence of this course and just how much I enjoyed it.

True to say that I was already aware of a fair bit of the overall content in terms of knowledge etc, but this did not detract from the benefit gained, all of which all helped to reinforce current knowledge, but at the same time gave the opportunity to discuss with other people in the profession and look at the issues concerned from a completely different perspective!

All the external speakers were very good and helped to clear up (or in some instances actually reinforce) the numerous ‘grey-areas’ that surround the ‘wild-west’ of fire safety!
